PROFILE

Master's student (M2) in Business Computing - Data Development and Analysis - at UCAO Dakar. I build Machine Learning models and take them to production: data preparation, modelling, explainability (SHAP), APIs, experiment tracking and data drift monitoring. Looking for an internship or a first role in Data Science / Machine Learning, in Dakar or remote.

PROFESSIONAL EXPERIENCE

ERP Consultant Intern (Odoo) | Toftal - client assignment at Ndiabour Annexe Apr 2026 - May 2026

- Gathered the client's business requirements and wrote the functional specifications for the procurement system.
- Configured the Odoo Purchase / Procurement module and structured the product database (item records, references, categories).
- Trained end users, led the go-live and provided post-deployment support.

Tools: Odoo, PostgreSQL, Excel

Software Developer Intern - final-year project | ONECS Aug 2024 - Oct 2024

- Designed and built an Android mobile app to track diploma authentication requests (frontend, backend and database).
- Gathered requirements from staff and modelled the solution in UML using an incremental agile approach.
- Wrote and ran unit and integration tests; fixed the defects found.

Tools: Java, Android Studio, PHP, MySQL, XML, Apache, Postman, GitHub

PROJECTS

Score Crédit - MLOps platform for credit default risk scoring 2025 - 2026

- Built an end-to-end Machine Learning pipeline on the Home Credit dataset (~307,000 clients): data preparation, class rebalancing (SMOTE), model training and comparison.
- Selected an XGBoost model (ROC-AUC 0.729) tuned on a business cost score weighting false negatives and false positives; explained every decision with SHAP.
- Deployed the model through a FastAPI REST API and a React interface; tracked experiments with MLflow, monitored data drift with Evidently, CI/CD with GitHub Actions.

Tools: Python, Pandas, scikit-learn, XGBoost, SHAP, FastAPI, MLflow, Evidently, React, PostgreSQL, GitHub Actions

PMO Dashboard - IT & Marketing project monitoring (Power BI) 2026

- Power BI dashboard of 247 projects across 4 regions: star schema, Power Query, 3 DAX alert KPIs, Gantt and Waterfall charts.

Procurement Management System - UCAO-ISG-CSM 2025 - 2026

- Django / PostgreSQL purchasing-cycle app for 8 roles: approval workflow, PDF purchase orders, role-based KPI dashboard.

ERP MEA - business management system 2026

- Django 5.0 ERP (inventory, sales, purchasing, accounting) with a full sales workflow, VAT calculation and Docker containerisation.

TECHNICAL SKILLS

Languages: Python, SQL, Java, PHP

Data Science & ML: Pandas, NumPy, scikit-learn, XGBoost, LightGBM, SHAP, feature engineering, classification, class imbalance (SMOTE)

MLOps & deployment: MLflow, Evidently (data drift), FastAPI, REST APIs, Docker, Git, GitHub Actions (CI/CD)

Databases: PostgreSQL, MySQL, SQLite

Visualisation & BI: Power BI (DAX, Power Query), Chart.js, advanced Excel

Methods: Agile / Scrum, UML, MERISE

EDUCATION

Master's in Business Computing - Data Development and Analysis, UCAO, Dakar, Senegal 2025 - present

Thesis: predictive modelling of credit default risk in the Chadian banking sector (Machine Learning).

Bachelor's in Computer Engineering, IUC (CEFOD), N'Djamena, Chad 2021 - 2024

Higher Technician Diploma (BTS) in Computing, IUC (CEFOD), N'Djamena, Chad 2021 - 2023

Baccalaureate, Science (Series D), Lycée Saint Étienne, N'Djamena, Chad 2021

LANGUAGES AND CERTIFICATIONS

Languages: French (fluent), English (intermediate - reading, writing, speaking)

Certifications: Scrum - Agile methodology (2025); GIS certificate - Geographic Information Systems (2023)
